DETAILED ACTION

Examiner acknowledges receipt of request for continued examination, under 37 CFR 1.114, filed 12/18/03; IDS filed 12/19/03 and 1/15/04; terminal disclaimer filed 1/15/04 and remarks filed 10/20/03. Claims 3-8 and 15-38 are pending.

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicants' submission filed on 12/18/03 has been entered.

Double Patenting

2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 15 and 16 rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 15 and 16 of prior U.S. Patent No. 6,372,229. This is a double patenting rejection.

Proteinaceous materials of the instant application are globular. Globular protein such as bovine albumin is a water-soluble protein and therefore a proteinaceous material; thus the scope of water-soluble proteinaceous material has not really changed.

3. Claims 3-8 and 17-38 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-14 of U.S. Patent No. 6,372,229. Although the conflicting claims are not identical, they are not patentably distinct from each other because the composition of instant claim 15 is the same as the composition in issued claim 1

Art Unit: 1615

except that issued claim 1 treats or coats endoluminal surface while in the instant claim 15, the composition is used to inhibit restenosis; in both cases the composition is applied to the site of injury. Instant claims 15, 3-8 and 15-38 are encompassed in issued claims 1-14.
